

We are a worldwide leading provider of laser beam projection displays that enable tech giants from Silicon Valley to Asia to unlock their Augmented Reality revolution.

To successfully continue our growth ambitions, we are looking for a

PRODUCT ENGINEER NPI (full-time) (f/m/d)

Your responsibilities:

- Responsible for technical lead of new product introduction process.
- Coordinate activities with Design, Test Engineering, Application Engineering and Quality Department for characterization coverage and product verification/validation.
- Maintain active tracking during the development process and change management.
- Perform characterization data analysis on test parameters of new products, to ensure they meet the product requirement specifications and manufacturing requirements.
- Perform data analysis, drive yield enhancement, and product cost reduction for company products.
- Review qualification results together with the project management team.
- Work closely with Production Test engineers and Operation team.
- Oversee introduction and maintenance of quality tools for production monitoring.
- Establish build concept, a production flow and documentation together with EMS partners.
- Prepare adequate resourcing and supply chain for scaling up of production line.

Your qualifications:

- Master's degree in Electrical Engineering, Mechanics Engineering, Physics, Industrial Engineering or related field.
- At least 5 years of relevant work experience, thereof minimum 2 years of practical experience in production related environment, preferably in multi-site/multi-cultural teams exercised in the electronic/semiconductor industry.
- Strong analytical and statistical analysis skills. Data Analysis proficiency.
- Hands-on mentality. Ability and interest in solving problems on the production line.
- Willingness to travel: 10%.
- Strong communication skills and the ability to deal with ambiguity.
- Excellent technical skills. Effective leadership. Self-starter.
- Excellent English language skills, knowledge of German or Chinese language considered as a plus.
- Experience or Familiarity with Six Sigma methodology is a plus.

Your benefits:

- Be part of a young, ambitious and international team with a flat hierarchy structure, with great team spirit and creativity.
- Work in a startup-like culture, with room to develop new ideas for innovation.
- Drive intensive co-operation with international and reputable electronics companies, working on exciting projects.
- Enjoy excellent development opportunities, continuously develop skills according to individual strengths and benefit from our proven mix of on-the-job training and external educational opportunities.
- We care about our country's climate – take advantage of a Job ticket as well as the opportunity to buy a bicycle through the Job Rad program.
